

# JASON GREEN

## WEB DEVELOPER

## Summary

---

As a web developer, I am looking to apply my knowledge of front and back-end skills to the tech industry. I am proficient in JavaScript, HTML5, CSS, SQL, Node.js, and React. My time in the Communications industry has taught me the value of conceptualizing ideas, and I'm looking to bring those past lessons along with my web development experience to a well established, innovative organization.

## Employment

---

### General Assembly

Web Development Immersive | Engineering Fellow

New York, New York

Mar 2018 to Jun 2018

- Completed a 12 week long training program dedicated to learning full stack web development
- Learned a multitude of computer programs, like React that I used to build applications and gather APIs
- Used Node.js to build servers and back-end applications

Marketing & Video Production

New York, New York

Mar 2017 to Jan 2018

- Spearheaded video production project by crafting scripts for YouTube product advertising
- Edit product and training videos using Adobe Premiere Pro
- Promote company products through social media channels and report results using Google Analytics

### Hilton Grand Vacations

Marketing Admin (Temp)

New York, New York

Aug 2016 to Mar 2017

- Scheduled informative Hilton Hotel tours daily, ensuring top-level customer satisfaction
- Promoted deals and packages to target market through the company database, increasing customer retention 40%
- Managed the referral program, targeting 100+ guests a day and increasing referral business 50%

### Niagara Conservation

Customer Service Representative

Cedar Knolls, NJ

May 2015 to May 2016

- Known for speed and receptive assistance to businesses and customers
- Increased customer retention 90% by providing friendly service to disgruntled clients, and swiftly solving the issue
- Liaised between Niagara and business partners, streamlining communications

## Projects

---

### Video Game Release Database

A project I made while at General Assembly. This is a release schedule of video games for the Playstation and Xbox consoles. It's made with Node.js, Express, and CSS. I built the API from scratch and it has full CRUD functionality.

### Nasagram

This was a group project where we built an Instagram-style API that gathered pictures and data from NASA. It was made with React, Node.js, Express, CSS, uses tokens for user authentication and has full CRUD functionality.
